EXECUTIVE SUMMARY

Operations leader with 9+ years building, scaling, and transforming high-performing teams. Hold operational and budget accountability for a 45+ member cross-functional team across three programs, and founded an AI automation unit that delivered \$88K+ in annual cost savings. Pair people leadership and organizational design with Lean, SIPOC, and KPI/KRI governance to move metrics at pace — a 25% quality uplift as SME and up to 90% reduction in average handling time as manager. Certified by Google and IBM in Project Management, Generative AI, RAG/Agentic AI, and Prompt Engineering.

AREAS OF EXPERTISE

People Leadership · Team Building & Org Design · Budget & Cost Accountability · Talent Development & Coaching · Performance Management · Change Management · Stakeholder Management · Cross-Functional Leadership · Operational Excellence · Process Reengineering · KPI / KRI Governance · SLA Management · Capacity & Workforce Planning · Vendor Management · AI Strategy & Roadmap · Executive Reporting

PROFESSIONAL EXPERIENCE

Team Manager — Operations & AI Transformation

Nov 2023 – Present

Opendoor Technologies · Chennai, India

- Hold operational and budget accountability for a 45+ member operations team across three programs — owning headcount, vendor costs, tooling spend, and performance targets simultaneously.
- Founded and built the AI automation unit from the ground up — defined the team charter, hired and developed five specialists, and led delivery of six production initiatives within 18 months.
- Delivered \$88K+ in annual cost savings through workforce optimization and process automation, reducing one core team from 13 to 6 while improving throughput, quality, and SLA performance.
- Lead cross-geography program delivery across India and US operations — aligning priorities, governing the performance cadence, and managing stakeholder relationships spanning three time zones and multiple functions.
- Govern KPIs and KRIs weekly across all programs — SLA compliance, handling time by case type, first-contact resolution, team utilization, and quality scores — with executive-level reporting.
- Apply SIPOC and value-stream mapping before every process redesign, eliminating waste ahead of automation and achieving up to 90% reduction in average handling time on high-volume workflows.
- Manage complex vendor relationships across programs, coordinating scheduling, compliance, and performance governance; expanded operational coverage from 60 to 100 markets in 2026.

Subject Matter Expert

Mar 2022 – Nov 2023

Opendoor Technologies · Chennai, India

- Redesigned multi-step workflows for a 25% improvement in quality scores by standardizing decision criteria, eliminating redundant handoffs, and structuring escalation paths.
- Built SOP and compliance frameworks adopted across multiple programs — establishing the documentation and decision standards the organization governs by today.
- Led cross-regional process transitions and migrated four cross-functional processes, applying structured change management to ensure day-one continuity across US and India teams.
- Ran root-cause analysis on recurring quality failures, implementing corrective actions tracked against measurable KPIs with a weekly review cadence.

Senior Customer Associate

Mar 2017 – Feb 2021

Allsec Technologies · Chennai, India

- Managed high-volume international financial services operations with consistent 100% SLA compliance across complex multi-party interactions.
- Served as quality reviewer and escalation point, contributing to process improvement and new-hire training design.

TRANSFORMATION INITIATIVES & BUSINESS IMPACT

- **Workforce Transformation — Feedback Operations:** Identified manual triage as the highest-cost, lowest-value workflow. Sponsored an automated classification-and-routing solution handling 1,000+ cases daily, right-sizing the team from 13 to 6 with no quality impact. ~\$55K saved; ROI within the first quarter.
- **Operational Efficiency — Document Review:** Mapped a 40-minute document-retrieval process as the primary source of waste and sponsored an automated workflow, cutting it below 10 minutes. Halved the team from 8 to 4 with better outputs; 75% handling-time reduction sustained 6+ months. ~\$31K saved.
- **Quality Governance — Full-Population QA:** Replaced 15–20% sample-based manual QA with automated full-population scoring against a 15-point SOP framework, lifting compliance coverage from ~20% to 100% at zero marginal cost.
- **Program Automation — Service Requests:** Scoped and governed an end-to-end service-request triage program covering a seven-stage workflow lifecycle, fully automated with duplicate-prevention and SLA controls; 1,000+ requests/week with zero manual intervention.
- **Process Automation — Procurement Ordering:** Replaced a recurring multi-vendor manual ordering process with an automated, region-routed workflow producing review-ready drafts; first live run processed 76 orders with no errors.
- **Cost Estimation — Vision-Based Measurement:** Eliminated a three-step manual estimation dependency by sponsoring a vision-based workflow that estimates measurements from imagery and validates against pricing and historical cost records.

SKILLS

Leadership & Team Management: budget & cost ownership, org design & scaling, hiring & talent development, coaching, performance management, change management, executive communication, cross-functional & cross-geography delivery

Operations Excellence: Lean / Six Sigma, SIPOC, value-stream mapping, SOP design & governance, root-cause analysis, Kaizen / continuous improvement, process reengineering, workforce & capacity planning

Performance Governance: KPI & KRI design, SLA governance, QA frameworks, audit & compliance, weekly performance cadence, business & executive reporting, vendor performance management

AI Transformation & Tools: AI strategy & roadmap, process automation, ROI measurement, human-in-the-loop design, vendor & platform management; working knowledge of SQL/data warehousing (Snowflake), ticketing/CRM (Zendesk), and workflow automation (Gumloop/Zapier)

CERTIFICATIONS

- Google Project Management Professional Certificate — 2025
- IBM Generative AI for Project Managers — 2025
- IBM RAG & Agentic AI Systems — 2025
- Google Prompt Engineering — 2025

EDUCATION

Master of Computer Applications (MCA)

2016 – 2018

Vels University · Chennai, India

Bachelor of Computer Applications (BCA)

2013 – 2016

Alpha Arts & Science College · Chennai, India
